

IKP Consulting Engineers

Building Construction

CONSULTING
ENGINEERS

■ Gigasport Průhonice – shopping centre

Introduction:

The Building Construction department has been a separate part of IKP CE s.r.o. since its foundation. It works independently on projects, or cooperates with the other departments within the firm.

The Building Construction department ensures and performs:

- complete design documentation from study up to implementation of contracts
- all static, dynamic and building physics calculations
- building static surveys
- consultancy
- optimization of proposed solutions
- design and assessment of concrete, steel, wooden and other structures

■ Pension Anežka – reconstruction

■ Hotel Paříž – Prague – reconstruction

- solution of interaction of foundations with the designed structure
- special problems of foundation engineering
- reconstruction and design of industrial buildings

■ MAN – Průhonice – service and administrative centre

■ Huber Průhonice – manufacturing area

■ O2 – Prague – operational centre
